

Mg-Al-Zn Alloy Poultry Battery Cage System 3 Tiers Large Spacing Breeder Breeding Equipment

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: H Type
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60days
- Payment Terms: L/C, T/T
- Supply Ability: 50000 sets per month

Product Specification

- Name: Poultry Breeder Breeding Equipment
- Cage Size: 4800mm*1200mm*700mm
- Capacity: 100 Birds Per Cage
- Tiers: 3 To 6
- Life Time: 20 Years
- Material: Mg-Al-Zn Alloy
- Feature: Anti-corrosion
- Highlight: **Mg-Al-Zn Alloy Poultry Battery Cage System, 3 Tiers Chicken Breeding Equipment, Large Spacing Chicken Breeding Equipment**

Product Description

3 Tiers Breeder Rearing Equipment Large Spacing Mixed Breeding Male Female

Housing equipment and feeding systems play an important role in layer breeder management. Only healthy birds guarantee high reproduction rates. Breeders are especially sensitive to changes in the house environment. With the correct equipment, temperatures and air speeds can be regulated as required by the birds, and ammonia and CO2 emissions are easy to monitor.

1. Natural mating cage: With a large cage design, male and female chickens are raised together, reducing various stress responses caused by artificial insemination and lowering labor costs.
2. Artificial insemination cage: With a small cage design, male and female chickens are raised separately, resulting in a high insemination rate.

Natural mating cage

Single cage specification	
Length	4800mm
Width	600mm
Height	700mm
Tier Height	850mm
Door/Width	1200mm
Unit Area	576cm ² /bird
Birds/cage	100 birds cage

Main advantages

1. optimum number of birds

- 2.healthy and vigorous males and females
- 3.clean hatching eggs
- 4.low salmonella risk
- 5.uniform high laying performance
- 6.good feed conversion
- 7.low mortality rate
- 8.high efficiency thanks to a high degree of automation (feed and water supply, egg collection, 9.manure removal)
- 10.low labour and control requirements
- 11.very low ammonia emissions
- 12.hardly any flies in the system
