## Product Description

## High Space Utilization Rate Broiler Chicken Cage for Broiler Rearing

## Advantages of Fully Automated Broiler Cage System

- 1.The stocking density per unit area is increased by 50%-100% compared to floor rearing.
- 2.Fewer chickens are kept in each small cage unit, reducing the potential for fecal-induced infectious diseases and thus minimizing mortality.
- 3.Cage rearing reduces the physical activity of broilers and accelerates their growth rate.
- 4.It is convenient to observe the flock growth and select. There is sufficient space for the chickens to feed and drink, ensuring good evenness and hygiene. It can prevent disease better compared to floor rearing.
