3 Tiers Poultry Battery Cage System Cage Free Eggs Cage-Free-X Improve Health And Welfare

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: cage-free-x
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C, T/T
- Supply Ability: 50000 sets per month

Product Specification

- Name: Poultry Cage-Free-X System
- Keywords: Cage-free
- Tier: 3 Tiers
- Materials: Al-Zn Alloy,High Zinc Series
- Service Time: 8-20 Years Based On Different Quality
- Assemble: Provide Assemble Video Or Manual
- Accessories: Feeder, Drinker, Egg Collection System, Manure Removal System
- Highlight: **3 Tiers Poultry Battery Cage System**, **Health Poultry Battery Cage System**, **Welfare Poultry Battery Cage System**

Our Product Introduction

Product Description

High Quality Cage Free Eggs Cage-Free-X Improve The Health And Welfare

The cage -free-x system is designed to increase the animal welfare and to guarantee excellent performances in terms of eggs production and management costs.The system is built on two or three tiers, with a structure which facilitates inspections and stimulates the hens to jump tier to tier.

Advantages

1.Multi-Layer Design

This allows hens to move up, down, and sideways, effectively preventing crowding and hotspots, leading to better ventilation and climate.

2.Multiple Perches

Hens enjoy walking on perches at different heights during the day and sleeping at higher elevations, which helps reduce stress and promotes better sleep.

3.Reduced Aggressive Behavior

Cage-free chickens tend to exhibit less aggressive behaviors such as pecking, chasing, fighting, bullying, feeding, or guarding water.

4.Open Design

Open aviaries allow laying hens to freely walk, run, and fly not only on perches but also scratch on the litter floor.

5.Automatic Egg Collection

for more products please visit us on farmrob.com

After laying, eggs are automatically transported by a conveyor belt and collected by an automatic egg collector.

6.Inclined Mesh Panels

The inclined design on each layer facilitates the collection of lost eggs, which can roll down to the egg collection area.

About us

Since our establishment, we have been dedicated to the research, design, production, and installation services of poultry farming equipment. We continuously integrate advanced European farming concepts and emerging technologies into the development of new equipment. Our goal is to create a one-stop supply chain of products for domestic and international poultry customers, including layer chickens, broilers, egg packaging, and environmentally friendly equipment.
