Product Description

Intelligent Farmrob Eggcounter

As the scale of animal husbandry in China continues to expand, production management has remained a challenging issue. In the past, it relied on manual labor, but now it depends on human intelligence. With the support of technological advancements, managing large-scale farms can become easier and more convenient. To manage farming effectively, data is crucial.

Overview

Using computer vision to count, eggs are recognized and tracked from images to achieve counting.

1. High-performance industrial all-in-one machines and industrial cameras are adopted to meet the usage requirements of complex environments and have a longer service life.
2. Deep learning algorithms are used with 99.8% accuracy, effectively recognizing eggs of different colors and sizes.
3. It can conduct separate statistics, and the data records can be exported.
4. It features an integrated design, making installation and debugging simple.
5. It can be connected to the Farmrob IoT platform.

Parameter

Type	CNT01	Rated Power	25W
Input Voltage	220v 50hz	Rated Current	0.15A
Ambient Temperature	< 60°C> -30°C	Ambient Humidity	< 80%
Camera Resolution	1280*720	Fill Light	12V 3W
