

Automatic Poultry / Chicken Egg Collection System For Laying Hen

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: H Type
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60days
- Payment Terms: L/C, T/T
- Supply Ability: 50000 sets per month

Product Specification

- Product Type: Poultry Farming Equipment
- Cage Size: 1800x600x430mm, 1800x650x430mm
- Material: High-content Al Series
- Area/Bird(c): 434/450 C
- Cage Capacity: 144-648 Chickens Per Set
- Capacity: 1000-5000 Eggs/hour
- Application: Poultry Farms
- Installation: Easy Install
- Egg Quality: High Quality
- Cleaning Method: Automatic
- Collection Method: Automatic
- Highlight: Automatic Chicken Egg Collector,
Poultry Egg Collection System,
Chicken Egg Collection System

Product Description

Easy Maintenance Egg Collection System Reduced Power Consumption Reliability For Laying Hen

Advantages

1. Increased Efficiency:

The egg collection system can significantly improve the speed and efficiency of egg collection, reducing labor costs.

2. Reduced Egg Damage:

By handling eggs gently through automation, the risk of micro-cracks and damage is minimized.

3. Lower Labor Intensity:

The automated system reduces the physical labor required by farmers, alleviating their workload.

4. Optimized Management:

The egg collection system is equipped with data management features that help farmers monitor production in real-time for more effective management.

5. Space Saving:

The compact design of the egg collection system allows for efficient operation in limited spaces.

6. Improved Product Quality:

By reducing human intervention and damage, the overall quality of the eggs is enhanced.

7. Ease of Maintenance:

The system is easy to maintain, allowing for simpler daily checks and upkeep.

8. Strong Adaptability:

The system can be adjusted to fit farms of various sizes, making it suitable for different farming environments.

Features Of Egg Collection System

1. The egg collection machine adopts high-strength chain transmission, which runs more smoothly, has an extremely low maintenance rate, and has a quite stable performance.

2. The egg belt is made of high-quality polypropylene (PP) material, with strong tension and resistance, to prevent egg displacement and effectively reduce cracked eggs;

3. The egg leakage device screens out broken and soft eggs to reduce cross-contamination of dirty eggs.

Stable structure

Polypropylene material with strong tension and resistance

The egg collection system is one of the important systems in our layer cage equipment. Customers can choose between fully automatic or semi-automatic options according to their needs.
