

430BA Stainless Steel Blade Poultry Box Fan High Air Volume For Poultry Breeding

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: BF01
- Minimum Order Quantity: 50 pc
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 2 Weeks
- Payment Terms: L/C, T/T
- Supply Ability: 2000 pc per/month

Product Specification

- Dimensions: 1380 * 1380 * 450 Mm
- Airflow: 39,300 M³/h
- Current: 2.8 A
- Voltage: 380 V
- Power: 1.1 KW
- Highlight: Poultry Box Fan, Poultry Breeding Box Fan

Product Description

430BA Stainless Steel Blade Poultry Box Fan High Air Volume For Poultry Breeding

In closed chicken houses, the use of fans is crucial, primarily for the following reasons:

1. Air Circulation

Maintaining Fresh Air: Fans promote air movement within the chicken house, ensuring that fresh air enters, thereby improving the growth environment for the chickens.

2. Temperature Control

Regulating Temperature: In hot weather, fans help lower the internal temperature of the chicken house, preventing heat stress and improving farming efficiency.

3. Humidity Management

Reducing Humidity: High humidity levels in the chicken house can lead to the proliferation of bacteria. Fans assist in expelling moist air, maintaining an appropriate humidity level.

In summary, fans play a vital role in closed chicken houses, serving as key equipment to ensure the healthy growth of chickens and enhance farming profitability.

Parameters

Belt	Mitsuboshi (Japan, Sanxing)
Bearing	C & U (Renben)
Blade Diameter	1270 mm
Zinc Coating	275 g/cm ²
Blade Material	430BA (Brightness 1000°, Reflectivity 6K)
Thickness of Upper and Lower Guard Plates	1.0 mm
Thickness of Side Guard Plates	0.8 mm
Thickness of Air Guide Cover	1.0 mm
Thickness of Louver Plates:	0.8 mm
Thickness of Middle Louver Plate	1.5 mm

characteristics

- 1.The fan frame and guide plates are made of 275 g/m² hot-dip galvanized steel, which enhances their rust resistance.
- 2.The fan blades are made of 430BA stainless steel, providing high strength and excellent resilience, making them resistant to rust.
- 3.The fan has minimal deformation during high-speed operation, ensuring a large airflow even under high negative pressure conditions.

After-sales

- 1.The company has two professional installation service teams to provide customers with installation and maintenance services.
- 2.There are detailed installation manuals and video materials available to guide customers in self-installation.
- 3.The company also offers a 24-hour hotline to address various questions that customers may encounter.

About us

- 1.We have 50 various types of injection molding machines to ensure the quality of plastic parts processing.
- 2.We also have 100 automatic lathes to ensure the precision and consistency of valve body machining.
- 3.Additionally, we have independently developed a multi-station assembly line, enabling automated and self-managed production for all products.
