8 Tiers Automatic Feeding System Layer Chicken Cage System with 700mm Story Height for Poultry Farming Equipment

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H Type
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Service Life: Over 15 Years
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Story Height: 700mm
- Cage Size: 1800x600x450mm, 1800x650x450mm
- Area/Bird(c): 434/450 C
- Application: Laying Hen Farming Equipment
- Feature: Automatic Layer Chicken Cage
- Highlight: **Reliable Layer Chicken Cage System**, **8 Tiers Layer Chicken Cage System**, **Even Feeding Layer Chicken Cage System**

Our Product Introduction

Product Description

Reliable and Even Feeding 8 Tiers Layer Chicken Cage System Fine Management

Reliable and Even Feeding 8 Tiers Layer Chicken Cage

System High Hardness

In modern chicken farming, uniform feeding is one of the cores of fine management. Feed cost typically accounts for 60% to 70% of total farming costs. Uniform feeding directly affects feed conversion rate, growth rate, egg production performance, and overall flock health.

Uneven feeding leads to significant individual differences within the flock, increased weak chickens, higher disease risks, and ultimately reduced farm economic benefits. Therefore, achieving scientific and rational uniform feeding is crucial for improving breeding efficiency and protecting chicken health.

Farmrob's filling and feeding system perfectly solves uneven feeding problems and improves feed conversion rate, making it ideally suited for all cage systems. The feeding system comprises a feed cart in combination with self-healing troughs and Farmrob's patented devices, creating a very cost-efficient and energy-saving solution.

Features

Equipment Design: 4+4 configuration for easy handling. Standard cage dimensions of 1800mm × 600/650mm × 450mm provide ample space for chickens to move freely. Tiered equipment with story height up to 700mm ensures sufficient light and clean air to facilitate chick growth.

Pedestrian Net: High strength and corrosion resistance with hot-dip galvanized construction. Uses 3mm thick flat steel with φ6 twisted steel wire (37mm × 100mm grid). Includes stairs and railings at front and back of coop with hot-dip galvanized, anti-corrosion railings.

Manure Removal System: Belt manure removal system maintains fresh air inside the house, reduces bacterial growth, and improves flock survival rates.

Main Advantages of Feeding System

- Easy operation
- Low malfunction rate
- Feed hopper made of hot-dip galvanized sheet metal
- Smooth running of the feed cart
- Filling system trough and patented devices like feed distributor ensure accurate and even feed dispensing
- Patented residue collector and anti-spill device avoid waste
- Fast installation
- Galvanized silo with weighing device
- Automatic control
- Real-time data recording

Why Choose Us?

Farmrob has more than 20 years of poultry farming experience and mature systems.

- Customized construction and project design and engineering solutions
- Reasonable and cost-effective quotation
- Chicken-oriented and animal-friendly equipment
- Advanced technical equipment with 25-year lifespan
- Provide installation and technical guidance
- Training for farmers on how to use and maintain the equipment
- Thoughtful service and perfect after-sales service system
