

Reliable and Even Feeding 8 tiers Layer Chicken Cage System Fine Management

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: H Type
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60days
- Payment Terms: ,L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Service Life: Over 15 Years
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Story Height: 700mm
- Cage Size: 1800x600x450mm, 1800x650x450mm
- Area/Bird(c) : 434/450 C
- Application: Laying Hen Farming Equipment
- Feature: Automatic Layer Chicken Cage

Product Description

Reliable and Even Feeding 8 tiers Layer Chicken Cage System High Hardness

In modern chicken farming, uniform feeding is one of the cores of fine management.

Feed cost usually accounts for 60% to 70% of the total cost of farming. Uniform feeding of chickens directly affects feed conversion rate, growth rate, egg production performance and overall health. If the feed is not uniform, it will lead to large individual differences in the flock, more weak chickens, increased risk of disease, and ultimately reduce the economic benefits of the farm. Therefore, the scientific and rational realization of uniform feeding is a key to improve the breeding efficiency and protect the health of chickens.

Farmrob's filling and feeding system perfectly solves uneven feeding problem and improve feed conversion rate, is ideally suited for all cage system. The feeding system comprises a feed cart in combination with self-healing troughs and Farmrob's patented devices, which is a very cost-efficient and energy saving system.

Features

1. Equipment Design

4+4 is easy to handle. The regular dimension of cage is 1800mm*600/650mm*450mm, keeping chickens move freely. The story height of this tiered equipment is up to 700mm, providing sufficient light and clean air to facilitate the growth of the chicks.

2. Pedestrian Net

High strength and corrosion resistance. Hot-dip galvanized. Using flat steel, thickness: 3mm, with $\phi 6$ twisted steel wire (37mm*100mm grid). Stair and railing at the front and back of the coop, hot-dip galvanized railing, anti-corrosion.

3. Manure Removal System

The belt manure removal system keeps the air inside the house fresh, reduces bacterial growth and improves the flock survival.

Main advantages of Feeding System

easy operation

low malfunction rate

feed hopper made of hot-dip galvanized sheet metal

smooth running of the feed cart

filling system trough and patented devices like feed distributor ensure accurate and even feed dispensing.

patented residue collector and anti-spill device avoid waste

fast installation

galvanized silo with weighing device

automatic control

real-time data recording

Etc.

Why Choose Us?

Farmrob has more than 20 years of poultry farming experience and mature system.

1. Customized construction and project design and engineering solutions
2. Reasonable and cost-effective quotation
3. Chicken-oriented and animal-friendly equipment
4. Advanced technical equipment with 25-year lifespan
5. Provide installation and technical guidance
6. Training for farmers on how to use and maintain the equipment
7. Thoughtful service and perfect after-sales service system
