Safe 6-tier Al-Zn-Mg poultry cage system for small chicks

Description:

Al-Mg-Zn alloy 30mm*40mm middle bracket and Q235 Al-Zn alloy wire ensure the service life of the equipment last for 15-20 years. Metal partition net buckle is directly buckle on the trough to keep even force. The cage frame is not deformed. The more dense grids of back net to prevent chickens from pecking at each other.

The the feeding and drinking regulator ensures the regulator move stably and meet demand of chicks at different ages. The chickens will not run away and get stuck. Plastic cushion is equipped to protect the feet of baby chicks.

Equipped with an automatic manure removal system to keep the manure away from manures in the cage, which improves the hygienic conditions and reduce the disease rate. The belt will always keep on track. The manure from each tier of cages is carried by manure belts to the end of the house. It is then transported out of the house.

The environment of chicken house is controllable, which is conducive to the physiological and production needs of chicken. We use high-end controller. H type pullet cage adopts a fully enclosed breeding mode to realize the separation of humans and chickens, greatly improve the environment.
