

3 Tiers Welfare Cage Free System Of Sufficient Activity Platform For Layers

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: Welfare system
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Material: Al-Zn-Mg Alloy
- Tiers: 3
- Feature: Anti-corrosion
- Service Life: Over 15 Years
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling System, Automatic Manure Removal System
- Highlight: **Sufficient Activity Platform Cage Free System , Welfare Cage Free System , 3 Tiers Cage Free System**

Product Description

3 Tiers Welfare Cage Free System of Sufficient Activity Platform For Layers

1. Multi-Layer Design

This design enables hens to move freely in all directions—up, down, and sideways—effectively minimizing overcrowding and eliminating hotspots. Also ventilation and air quality improved and optimized. Enough activity platforms are provided and separated from the manure belts to prevent chickens from getting infected, respecting their natural instincts, increasing the effective activity area, and also ensuring the stocking density.

2. Multiple Perches

The perches satisfy chickens' natural roosting instinct and reduce ground activity time, which can lower flock stress levels, improve rest quality, and gain more stable egg production.

3. Automatic Egg Collection

After laying, eggs are automatically transported by a stable conveyor belt and collected by an automatic egg lift, which can prevent from breaking eggs.

4. Chain Feeding

Bilateral feeding. Meet the feed intake standards and ensure that each chicken can eat evenly, reducing feed waste.

5. Inclined cushion

The inclined design on each layer facilitates the collection of lost eggs, which can roll down to the egg collection area. Raising the position of nest at night can prevent chickens from entering the nest and incubation.

6. Water line beside the nest

Provide sufficient drinking water to lure chickens into the nest to lay eggs and help reduce the number of floor eggs.

FAQ

1.Q: Are you a manufacturer?

A: Yes, we have been providing professional products in this field.

2.Q: Can you design the drawings of the chicken coop for my farm?

A: Yes, You need to provide us with the size of the farm and your design concept.

3. Q: Can you provide technical training?

A:Yes, we provide the guidance of installation and maintenance.

4. Q: How about your service

A: Offering pre-sale service, one-site service, including project design, quality control,

installation, debugging, after-sale service and farming guidance.
