

Precision-engineered Layer Chicken Cage System with Comfortable Living Environment

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: H type automatic equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Material: Al-Zn-Mg Alloy
- Service Life: Over 15 Years
- Feature: Anti-corrosion
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling System, Automatic Manure Removal System
- Service: Technical Training, Installation Guidance

Product Description

Precision-engineered Layer Chicken Cage System with Comfortable Living Environment

Farmrob can provide the most suitable solutions for clients based on some key factors like weather, humidity and scale, etc. Our mission is to help customers rear chicken easily and max the profits. Our chicken cage system is certified by ISO9001:2015, featuring a scientifically optimized design for maximum efficiency. Built with a robust structure, it ensures durability and reliable performance. We provide installation guidance services, making it an ideal choice for large-scale poultry farms with closed-house operations. Our equipment has gained widespread popularity for its productivity and ease of management.

Features

1. Reasonable area with 434 ² and comfortable environment with soft wind speed, fresh air and clean cage. The burr-free cage protects the chicken's skin
2. Lower mortality with and higher egg production rate. The egg guard board, Q235 soft bottom net, and stable egg convey devices greatly reduce the damaging rate.
3. Double water line provide sufficient drinking water. And nipples with special structure do not leak water. The water line is 325cm away from front net for easy check.
4. Feeder with patented devices like automatic feed distributor, residue collector, anti-spill device can keep even feed thickness and avoid the waste of feed. Chickens have same area to eat. Sufficient feed, water position and health uniformity are better for chicken.
5. Manure belt and chickens are completely isolated. Manure belt is 13-15cm away from the top net. Manure can be directly through the net grid and keep cage clean. Reduced disease transmission from contaminated manure, significantly lowering chicken mortality rates.
6. Sliding door. Easy to observe and catch birds. Automatic systems reduce the labor intensity.
