Product Description

Easy-to-use Layer Chicken Cage System Precise Control

Features

1. Intelligent Environment Control System

Real-time monitoring of temperature, humidity, ammonia, and CO₂ levels allows staff to quickly identify and control harmful factors, enabling timely adjustments to ventilation and climate control systems to maintain a comfortable living environment.

2. Energy saving

Patented nipple design minimizes water waste, while integrated water cups prevent leakage caused by the natural movement of chickens' heads and tails. The precision feeding system ensures efficient feed delivery, reducing waste. Energy-saving LED lighting, equipped with an adjustable dimming system, not only lowers stress levels—preventing harmful behaviors like vent and egg pecking—but also reduces electricity consumption.

3. Thoughtful Big Data Platform

Remote control with precision management. Each egg belt pocket can be equipped with egg counters to accurately record the number of eggs per tier, monitoring production rates and assessing hen health. Water level alarm detects pressure changes to ensure adequate drink water for every bird. The system also features an automatic feed alert, guaranteeing uninterrupted supply.
