Product Description

Automatic Poultry Cage System Growth Optimization for Baby Chicks

Features of H Type Automatic Pullet Cage

1. Al-Zn alloy wires have smooth surface, good elasticity; Al-Zn-Mg middle frame and hot-dipped galvanized has high strength. Spring door can be opened easily and large cage for easy observation of chick growth.

2. Poultry manure belt is isolated from the chicks, ensuring a clean and hygienic environment while minimizing contamination between waste and chicks. The automated manure removal system significantly reduces disease transmission and lowers chick mortality rates.

3. The feed trough features an adjustable plate, allowing precise adaptation to chicks' feeding needs at various growth stages. This ensures adequate feeding space and promotes uniform, healthy development.

4. A pressure-regulated water line ensures uniform water flow to every nipple drinker, guaranteeing adequate hydration for the flock. Water pipes are equipped with height adjusters to meet chick's daily water intake at different ages.

5. These systems optimizes poultry farming efficiency by automatically controlling the entire rearing process, ensuring optimal growth conditions.
