

CE H type Layer Chicken Cage System for Morocco Farm

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Service Life: Over 15 Years
- Trading Method: EXW, CFR
- Stroy Height: 700 Mm
- Services: Technical Training, Installation Guidance
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System

Product Description**CE H type Layer Chicken Cage System for Morocco Farm****Cage System**

(1) Layer cage meshes are made of Q235 steel Al-Mg-Zn alloy. This combination provides optimal elasticity, ensuring the comfort and well-being of the birds, which promotes higher laying rates.

Feed troughs: made of Al-Mg-Zn alloy (Zn 275g/m², Al 10%, Mg 3%) with 0.95-0.98mm thickness with round edge for convenient cleaning, solid and durable design.

(2) Cage nail: Stainless steel. It is a good way to fix the metal mesh quickly and firmly, suitable for occasions with high requirements for rust prevention and durability.

(3) Pedestrian net: For 6-12 tiers, it is necessary to construct to provide safe access for operation and inspection. Hot-dip galvanized pedestrian safety net fabricated from 3mm thick flat steel and $\phi 6$ mm twisted steel wire with a 37mm x 100mm mesh grid.

Automatic Feeding System

Both of the traveling hopper(feeding carts) type and chain feeding type are available.

The feeding cart connected with the silo by the auger filling device is for 3-5 tiers. For 6-12 tiers, feeding cart connected with the silo by the disc chain filling device. In this system, even feed is distributed automatically to the troughs from the feed hoppers. Feeding outlet will automatically close after the feeders move away to avoid feed dropping.

Product advantages:

Long lasting quality, our material with 15-20 years lifespan.

I. Fine management and automatic control.

II. No food waste, uniform feed thickness.

III. High density farming, saving land and investment.

We provide our customers with poultry farming solutions, including product research and development, project planning, production, installation and maintenance.

FAQ

1.Q: Are you a manufacturer?

A: Yes, we have been providing professional products in this field with over 20 experience.

2.Q: Can you design the drawings of the chicken coop for my farm?

A: Yes, You need to provide us with the size of the farm and your design concept.

3. Q: Can you provide technical training?

A:Yes, we provide the guidance of installation and maintenance.

4. Q: How about your service

A: Offering pre-sale service, one-site service, including project design, quality control, installation, debugging, after-sale service and farming guidance.
