

Integrated Layer Chicken Cage System for Optimized Management

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-aging, Anti-corrosion
- Service Life: Over 15 Years
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Services: Technical Training, Installation Guidance
- Accessories: Feeders, Nipples, Manure Belt, Etc

Integrated Layer Chicken Cage System for Optimized Management

Farmrob can offer planning from construction to equipment design based on the specific breed and poultry scale, and integrate them with comprehensive automated systems for manure cleaning, feeding, egg collection, and climate control. The advantages of our fully automated equipment include increased farm density, feed saving, and improved flock health management, advanced automation, bad smell reduction, disease reduction, keeping chicken house dry, bringing big profit for your farm.

Features

Cage door: This sliding door design allows for easy bird movement, is simple to operate, and prevents escapes.

Bottom wire mesh: The bottom mesh is constructed from high-strength, elastic Q235 Al-Zn alloy wire. It features a 7.5-degree gentle slope (1800*650*600 mm), which effectively cushions the eggs' roll, guiding them gently to the collection area to prevent breakage.

Manure removal roller: Front nylon spiral rollers keep the manure belt from deviating and clean accumulated manure. Both the large and small rollers at the back manure bracket are made of injection-molded tire rubber driving wheels, which have good plasticity, increase friction, eliminate stress and protect the manure cleaning belt.

Top mesh: It prevents chickens from pecking at the manure belt. The cage features a 700mm story height for optimal ventilation and fresh air. You can choose top meshes with denser grids.

Egg protective board: It prevents egg pecking and protects the bottom-layer feed trough from contamination by manure.

Gears & axles: Machined parts; Farmrob has its own machining workshop. The relevant accessories are made of 45 steel. After fine processing such as lathe process, milling, and then hardening and tempering, electroplating, they have good anti-corrosion performance and high wear resistance.

Why Choose Us?

Farmrob has more than 20 years of poultry farming experience and mature system.

- 1.Top 1 layer equipment supplier and manufacturer in China
- 2.Customized construction and project design and engineering solutions
- 3.Reasonable and cost-effective quotation
- 4.Chicken-oriented and animal-friendly equipment
- 5.Advanced technical equipment with 25-year lifespan
- 6.Provide installation and technical guidance
- 7.Training for farmers on how to properly care for the birds and use and maintain the equipment
