Product Description

Adjustable Feeding System Poultry Cage System for Baby Chickens

Automatic pullet cages information

1. Cage: 1.8m*0.6m*0.45 (length*width*height) Raise chicks from 0-105 days. It is equipped with spring door, which can be operated with one hand. Convenient for vaccinations and transferring chickens in and out.
2. Step: Allows chicks to easily access trough at a very young age, with a step placed behind the trough.
3. Feeding plate adjusting device: Each layer can be automatically adjusted on each side. Suitable for different ages. Patent structure: consistent front and rear adjustment, minimal error.
4. The adjustable water line linkage meets the requirements of birds at different growth stages, which is installed on every tier. Each water line features plastic connectors to prevent pipe deformation effectively. The linkage utilizes alloy components to maintain a consistent water level height across the system.
5. Uniform ventilation and illumination: Story height is 700mm, and the distance between the top mesh and the manure belt is 13-15cm. Improve ventilation effect and reduce pollutant exposure for the birds.
6. Wire mesh is Al-Zn alloy without burrs. Equipped with plastic cushion for comfortable living condition. Ensure the best anti-rust performance and no hurt to chicks.

H Type Battery Chicken Cage Features

1. Centralized management allows for more efficient use of energy and labor resources
2. Even feed distribution can keep chicken uniformity and healthy body.
3. Adjustable feeding and drinking systems can meet growth requirements at different

ages.

Support and Services:

The cage rearing system is a high-quality, durable, which designed to meet the needs of poultry farmers.

The technical support and services we offer include:

- 1.Installation Guidance: Ensuring smooth installation and proper functionality of the system.
- 2.Regular Maintenance and Repair Services: Keeping the system in optimal working condition.
