

## High Uniformity Layer Chicken Cage System in Vietnam

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic systems
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Technical Training, Installation Guidance
- Materials: Al-Zn-Mg Alloy, Al-Zn Alloy, Etc.
- Service Life: Over 15 Years
- Services: Technical Training, Installation Guidance
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System

## Product Description

### High Uniformity Layer Chicken Cage System in Vietnam

Farmrob's layer farming systems enhance flock uniformity compared to traditional floor rearing. They also enable easier monitoring and quicker identification of unwell birds.

The design of our cages ensures that every bird has equal and sufficient access to feed, with a consistent trough depth maintained at all times.

1. Drinking system features a dual-line water supply, allowing for individual control and user-friendly operation. Each row is served by a water pipe, simplifying inspection and maintenance of pipes and nipple drinkers. The system ensures a reliable and sufficient water supply to meet daily demands.

2. Using automatic manure belt and conveyor reduce the labor consumption, and directly and timely convey manures to trucks or manure treatment plants to ensure clear air in the chicken house and reduce the transmission of disease.

3. Cooling and ventilation system consists of fan, side window, cooling pad, air deflector and so on. Based on the capacity and climatic conditions, we will design the most suitable environmental control system for chickens to live in. High quality ventilation fans and controller ensure effective climate control inside the poultry house. The air deflector help better control the wind direction to prevent chickens from getting sick.

#### Support and Services:

The cage rearing system is a high-quality, durable, which designed to meet the needs of poultry farmers.

The technical support and services we offer include:

1. Installation Guidance: Ensuring smooth installation and proper functionality of the system.
2. Regular Maintenance and Repair Services: Keeping the system in optimal working condition.
3. Technical Troubleshooting: Quickly resolving any issues encountered during use.
4. Training and Instruction: Providing training on system usage and best practices in poultry management.
