

High-Capacity Layer Chicken Cage System for Poultry Farming Operations

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Service Life: Over 15 Years
- Services: Maintenance, Debugging, Technical Training, Installation Guidance
- Story Height: 700 Mm
- Feature: Anti-corrosion
- Cage Size: 1260*650*450mm-2 Doors/cage;
1800*650*450mm-3 Doors/cage

Product Description

High-Capacity Layer Chicken Cage System for Poultry

Farming Operations

Fabricated from durable Al-Mg-Zn alloy, Farmrob's layer cages are built to withstand harsh conditions while offering excellent resistance to corrosion and rust. Their sturdy construction ensures a secure and comfortable environment that promotes bird health and productivity.

Advantages:

- 1.The environment of a poultry house is regulated to provide optimal conditions for the chickens' physiology and production requirements.
- 2.The system incorporates automation in feeding, drinking, manure removal, and egg collection. This significantly reduces labor requirements and thereby lowers overall operational costs. Furthermore, the multi-layer cage design is far more space-efficient than traditional floor raising, which leads to a higher land utilization rate and saves on both housing construction and land costs.
- 3.The enclosed design of the chicken house acts as a physical barrier against the outside environment, greatly reducing the risk of cross-contamination. This enhanced biosecurity facilitates the prevention and control of epidemic diseases.
- 4.The water level sensor monitors the water pressure and supply in the pipes. Water terminator is connected to drainage device, which it triggers to prevent water spillage, ensuring easy and maintenance-free level control.
