Product Description

3-12 Tiers Layer Cage System with Stable Egg-Collection

Healthy chickens are generally more productive than those raised under unfavorable conditions. Farmrob's enrichment cages maximize egg production potential through innovative design and durable construction.

Product Specifications

Design: H-type fully automated layer cage equipment

Application: 3-12 tiers configuration for modern farms

Material: Al-Zn-Mg alloy plate, Q235 Al-Zn alloy wire with 275g/ coating thickness

Feed Trough: Al-Zn-Mg alloy plate (0.95-0.98mm thickness) with strong adhesion and self-healing properties

Manure System: Each tier equipped with manure belt for regular waste removal, reducing ammonia concentration

Egg Collection: Stable process with minimal breakage, featuring defective egg filter and high-friction PP egg belt

Key Features

- Durable hot-dip galvanized square tube construction
- Sturdy feeding trough supports worker weight for overhead operations
- Optional central egg collection system available
- Unused PP egg and manure belts for long service life
- Improves air quality through effective manure management
