

Scientifically Designed Layer Chicken Cage System for Vietnam Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Service Life: Over 15 Years
- Story Height: 700mm
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Trading Method: EXW, FOB, CFR, CIF
- Highlight: **scientifically designed layer chicken cage, layer chicken cage system Vietnam, poultry farming cage system Vietnam**

Product Description

Scientifically Designed Layer Chicken Cage System for Vietnam Farms

Farmrob delivers premium poultry farming equipment to customers worldwide. The H-Type Cage System has emerged as the solution of choice for large-scale operations, delivering significant gains in efficiency, improving overall hygiene, and streamlining farm management. Certified to ISO9001:2015 and CE standards, our chicken cage system incorporates a scientifically optimized design for maximum productivity.

Farmrob Automatic Feeding System

Our automated feeding solution ensures smooth operation and user-friendly control, enabling farm operators to feed an entire house at one time and maintain excellent flock uniformity.

Effortless Operation: The system is designed for simplicity, allowing for the efficient feeding of an entire poultry house in one automated process to support consistent flock growth.

Durable Trough: Constructed from Al-Mg-Zn alloy, the trough offers exceptional corrosion resistance, structural strength, and damage recovery properties to withstand constant pecking.

Reliable Trolley: Featuring a simple and robust structure, the cart ensures uniform feed distribution and a low failure rate. Its integrated, patented components include a Chicken Driver for gentle bird guidance and a Residue Collector for waste reduction.

Precision System: The two-stage auger filling process is employed, where separate motors independently control the slant and transverse filling. Filling probe can regulate the feed supply. The system is further enhanced by an integrated feed leveler that guarantees distribution accuracy, eliminating nutritional inconsistencies.

Egg Collection System

After laying, eggs are gently conveyed via a high-friction belt that prevents slippage and breakage. They are then smoothly transferred to an automatic egg lift with operational stability and minimal downtime. Farmrob's egg collection systems are engineered to exceed expectations by ensuring:

- Exceptionally gentle handling
- Outstanding reliability
- Effortless operation

This results in significant time savings, reduced labor costs, superior egg quality, and precise production tracking—addressing the essential needs of modern poultry farming.

System Specifications

Feature	Specification
Tiers	3-12
Quantity of Cells/Cage	2; 3
Each Cell Size (mm)	630*650*450mm; 600*650*450mm
Cage Size	1260*650*450mm; 1800*650*450mm
Quantity of Birds/Cell	9
Area /Bird	455cm ² ; 434cm ²
Story Height	700mm

Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. The technical support and services we offer include:

- Installation Guidance: Ensuring smooth installation and proper functionality of the system.
- Regular Maintenance and Repair Services: Keeping the system in optimal working condition.
- Technical Troubleshooting: Quickly resolving any issues encountered during use.
- Training and Instruction: Providing training on system usage and best practices in poultry management.

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
