

100000 Pullets Poultry Battery Cage System with Durable Materials

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic pullet system
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Service Life: Over 15 Years
- Services: Maintenance, Debugging, Technical Training, Installation Guidance
- Story Height: 700 Mm
- Feature: Anti-corrosion
- Trainings: Installation, Maintenance, Debugging
- Highlight: **100000 pullets poultry battery cage, durable poultry cage system, large capacity battery cage system**

Product Description

100000 Pullets Poultry Battery Cage System with Durable Materials

Farmrob is dedicated to supporting the thriving growth of your chickens through reliable, long-lasting equipment. Our designs are informed by over 30 years of industry experience, ensuring both bird health and operational efficiency.

Key Features

Robust Construction: We guarantee equipment longevity and smooth operation through the use of premium components, including Q235 Al-Zn alloy wire, Al-Zn-Mg alloy brackets, flicker-free high-end LED bulbs, and non-deformable manure belts.

Space & Labor Efficiency: Our system enables intensive rearing while optimizing land use. The fully automated processes for feeding, drinking, and manure removal are designed for easy operation, significantly reducing labor costs.

Automatic Pullet Cages Specifications

Cage Dimensions: Designed for rearing chicks from 0 to 105 days old, this cage measures 1.8m (L) x 0.6m (W) x 0.45m (H) and accommodates 11 birds, providing a stocking density of 327 cm² per bird.

Spring Door: For easy vaccination and safe transfer of chickens in and out of the cage.

Uniform Ventilation & Lighting: The story height is 700mm, with a 13-15cm gap between the top mesh and the manure belt, ensuring optimal fresh air circulation for the birds.

Burr-Free Al-Zn Alloy Mesh: Integrated with a plastic cushion to provide a comfortable living environment, offering superior rust resistance and preventing injury to the chicks.

Adjustable Feeding Plate: Features independent adjustment for each side of every tier. This allows precise adaptation to different growth stages, with minimal error in front-to-back positioning.

Reliable Trolley: Simple structure for easy operation and uniform feed distribution, ensuring a low failure rate. Equipped with patented features like the chicken driver and residue collector.

Height Adjuster of Water Line: Accommodates the needs of birds at different ages, with one device installed per tier. Each line utilizes soft connections to prevent pipe deformation, and alloy pull components maintain consistent height across the water line.

Backflush Device: Every water line is equipped with a backflush device, enabling prompt and thorough cleaning of the pipes and nipple drinkers after the administration of medications or nutritional supplements.

Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.

Installation Guidance: Ensuring smooth installation and proper functionality of the system.

Regular Maintenance and Repair Services: Keeping the system in optimal working condition.

Technical Troubleshooting: Quickly resolving any issues encountered during use.

Training and Instruction: Providing training on system usage and best practices in poultry management.
