

Smooth Operation Layer Chicken Cage System for Closed-House Poultry

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Service Life: Over 15 Years
- Story Height: 700mm
- Cage: 1260*650*450mm-2 Doors/cage;
1800*650*450mm-3 Doors/cage
- Trainings: Installation, Maintenance, Debugging
- Highlight: **closed-house layer chicken cage system,
smooth operation poultry cage system,
layer chicken cage with warranty**

Product Description

Smooth Operation Layer Chicken Cage System for Closed-House Poultry

Our mission is to simplify poultry farming and help you raise healthier chickens while maximizing both productivity and profitability.

We begin with professional pre-sales consultations and complete layout planning for your site. Furthermore, we provide comprehensive guidance and hands-on training, walking you through the installation, operation, and daily maintenance of the equipment to ensure a seamless setup and optimal performance.

Ideal for large-scale, closed-house poultry operations, our fully automated systems enable refined and precise farm management.

Layer Cage Advantages:

1. The Al-Zn alloy wires feature a smooth surface and excellent elasticity. The Al-Zn-Mg middle support combined with hot-dip galvanizing head support provides high bearing capacity. The egg protection plate and extended egg packet help prevent chickens from pecking at eggs.
2. The poultry manure belt is isolated from the layers, ensuring a clean and hygienic environment while minimizing contamination between waste and chickens. The automated system directly and regularly discharges waste completely out of the house, significantly reducing disease transmission and lowering chick mortality rates.
3. Our feeding system is easy to operate and ensures uniform feed distribution with a low failure rate. The large-capacity hopper can meet round-trip feeding requirements. Equipped with a patented residue collector, it gathers leftover feed into the breeding area, effectively reducing feed waste.
4. Farm owners can operate our automated system simply by pressing buttons on the control cabinet, saving both time and labor. Our fully automated systems optimize poultry farming efficiency by automatically controlling the entire rearing process and ensuring optimal growth conditions, while also reducing labor demands.

Fully Automatic Systems:

Automatic feeding system

Automatic drinking system

Automatic egg collection system

Automatic manure removal system

Automatic cooling and ventilation system

Support and Services:

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers.

The technical support and services we offer include:

1. Installation Guidance: Ensuring smooth installation and proper functionality of the system.
2. Regular Maintenance and Repair Services: Keeping the system in optimal working condition.
3. Technical Troubleshooting: Quickly resolving any issues encountered during use.
4. Training and Instruction: Providing training on system usage and best practices in poultry management.

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
