

Excellent Ventilation and Cooling Layer Chicken Cage System for Morocco Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **ventilated layer chicken cage system, cooling layer cage for Morocco farms, poultry farm ventilation cage system**

Product Description

Excellent Ventilation and Cooling Layer Chicken Cage System for Morocco Farms

The H-type automatic cage system has emerged as the preferred solution for large-scale poultry farms, delivering substantial gains in operational efficiency, hygiene standards, and management simplicity. With just one or two operators required for daily operation, it significantly reduces labor demands while streamlining workflow. Made of premium materials such as Al-Zn-Mg alloy, the equipment ensures outstanding durability and an extended service life.

The system saves significant space by utilizing a vertical, tiered design for three-dimensional rearing. This high-density approach allows for a substantial stocking capacity, typically accommodating over 30,000 layers.

Ventilation and Cooling System Overview

Through professional calculation and design, combined with reliable core components, our ventilation and cooling system creates an optimal environment for poultry houses: excellent air quality, suitable temperature, adequate air velocity, sufficient air volume, and correct airflow direction.

Given a well-sealed, insulated, and thermally efficient poultry house, we can guarantee a temperature differential under 2°C from the front to the back.

High-Performance Fans: We choose reliable fans that deliver high airflow capacity, low failure rates, and minimal performance degradation, along with strong resistance to negative pressure.

Comprehensive Airflow Coverage: With side windows and ventilation openings, the system provides consistent airflow and ventilation points without dead spots.

Durable Cooling Paper: The cooling paper is made of highly absorbent cellulose that resists damage and comes equipped with a double rodent mesh.

Advanced Air Deflector System: The air deflector is composed of 5cm foam-filled fireproof color steel plates with aluminum alloy frames. It includes sealing strips and curtains, which prevents uneven ventilation and dead air zones from forming.

Safety Mechanisms: Both the airflow deflectors and side windows are equipped with an anti-pull mechanism that prevents motor over-stretching and cable snapping due to worker error or power outages.

Seasonal Adaptation: Regardless of the season, our system activates the most suitable ventilation mode to precisely maintain a stable environment within the house.

Technical Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.

Installation Guidance: Ensuring smooth installation and proper functionality of the system

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any issues encountered during use

Training and Instruction: Providing training on system usage and best practices in poultry management
