

## Standardized Closed Layer Chicken Cage System for Russia Farms

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700 Mm
- Highlight: **closed layer chicken cage system, standardized chicken cage for Russia, layer cage system for poultry farms**

## Product Description

### Standardized Closed Layer Chicken Cage System for Russia Farms

Engineered for superior animal health and operational efficiency, the H-Type Automatic Cage ensures a safe, clean, and stress-minimized habitat for layers. Made of premium, corrosion-resistant materials, it delivers exceptional service life, lasting more than 15 years. The cage is also easy to install, clean and maintain.

By maximizing space utilization through its high-density layout, the system significantly cuts land use and lowers investment. The innovative design also empowers farmers with effortless flock monitoring and simplifies the management process, like selective culling of weaker birds, to drive optimal farm productivity.

#### Key Features

- **Cage Design:** Proper mesh size prevents chickens from getting stuck or escaping while allowing manure to fall through, reducing egg contamination. The cage provides ample moving space. Anti-scratch treatment ensures all welded joints are smoothly polished to protect the birds' feathers and skin. Additionally, its high-strength frame guarantees long-term stability, preventing deformation or collapse.
- **Feeding System:** Designed for reliable long-term operation, the feeding system features a corrosion-resistant Al-Mg-Zn alloy trough that maintains integrity under constant pecking. Its robust trolley delivers feed evenly with exceptional reliability. Key patented components like efficient residue collector work in concert to streamline flock management and minimize waste, providing a complete and efficient feeding solution.
- **Environmental Control:** Integrated monitoring devices, including water level detectors and feeding probes, ensure that the chickens' daily nutritional and hydration needs are consistently met. The intelligent dimmer simulates a natural daylight cycle to prevent stress caused by sudden bright light. Furthermore, precise environmental control, supported by the house's sealed, well-insulated design, maintains an extremely stable temperature, ensuring a healthy and comfortable environment for growth.

#### System Advantages

- Enhance the rearing environment through effective reduction of ammonia concentration and pathogenic germs
- Optimize operational management by substantially decreasing dependence on manual labor
- Strengthen biosecurity by minimizing the risks associated with disease transmission
- Promote animal welfare by reducing stress, thereby stimulating growth and lowering mortality rates
- The control system automates the complete set of systems for feeding, egg collection, manure removal, ventilation, and lighting

#### Why Choose Farmrob?

With over 30 years of poultry farming experience and mature systems, Farmrob delivers comprehensive solutions for your operation.

- Customized construction and project design and engineering solutions
- Reasonable and cost-effective quotation
- Chicken-oriented and animal-friendly equipment
- Advanced technical equipment with over 15-year lifespan
- Professional installation and technical guidance
- Training for farmers on proper bird care and equipment maintenance
- Thoughtful service and comprehensive after-sales support system
