

Comfortable Layer Housing Layer Chicken Cage System for Iran Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer system
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **comfortable layer chicken cage system, layer chicken cage for Iran farms, poultry housing layer cage system**

Product Description

Comfortable Layer Housing Layer Chicken Cage System for Iran Farms

Farmrob specializes in providing customized poultry farming solutions designed to simplify operations and maximize profitability. Our robust equipment ensures long-term durability and reliable performance, making it ideal for large-scale, closed-house operations. Widely recognized for enhancing productivity and farm management efficiency, Farmrob systems are trusted by farmers for sustainable, high-performance rearing.

System Features

- **Cage Frame System:** Constructed with Al-Zn alloy mesh for superior rust resistance and smooth, burr-free surfaces. Elasticized wire meshes provide bird comfort and gentle egg landing, while the open design ensures optimal ventilation. Middle supports use high-strength Al-Zn-Mg alloy sheet for enhanced durability.
- **Automated Feeding:** Features a filling device that transfers feed from external silos to distribution trolleys aligned with each cage row. The trolley operates back and forth to dispense feed uniformly into troughs, ensuring consistent access for all chickens.
- **Automated Manure Removal:** Each tier includes manure belts beneath the bottom net where droppings fall directly. Operating on scheduled intervals, the belts transport waste out of the poultry house, significantly reducing ammonia levels and improving indoor air quality.
- **Automated Environmental Control:** Integrated control systems continuously regulate temperature, humidity, and ventilation to maintain a stable, comfortable living environment for the chickens.
- **Egg Collection System:** Begins with high-friction belts that gently convey eggs to minimize breakage. Eggs are smoothly transferred to an egg lift known for operational stability and minimal downtime. The system delivers gentle handling, outstanding reliability, and effortless operation.

Technical Support & Services

Our high-quality, durable cage rearing system is designed to meet the specific needs of poultry farmers. We provide comprehensive support services including:

Installation Guidance: Ensuring smooth installation and proper system functionality

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any operational issues

Training and Instruction: Providing comprehensive training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
