

## Long Lasting Stability Layer Chicken Cage System for Russian Farms

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **long lasting layer chicken cage, stability layer cage system, Russian farm chicken cage system**

## Product Description

### Long Lasting Stability Layer Chicken Cage System for Russian Farms

Developed by Farmrob's expert technical team, this automated layer cage system integrates innovative engineering with cutting-edge technology to deliver peak performance and unwavering reliability in demanding farming environments.

#### System Overview

The H-type fully automated layer cage system features robust construction with outstanding stability and sustained operation. Configurable in 3 to 12 tiers, it optimizes space utilization while minimizing land requirements and operational costs.

#### Key Features & Specifications

##### Materials & Construction:

- Al-Zn-Mg alloy plate and Al-Zn alloy wire construction
- PP material used in critical components (egg belt, manure belt)
- High-density breeding system design

#### Advanced Feeding System

Farmrob's patented precision feeding system ensures uniform feed distribution with user-friendly operation. The integrated feed leveler and residue collector automatically return residual feed from trough ends, saving labor and preventing waste.

#### Water Management

Double water lines with double nipples provide constant access to drinking water. Patented nipple drinkers minimize water waste and prevent clogging, while an integrated dosing pump ensures accurate proportional injection of supplements.

#### Environmental Control

The integrated ventilation and cooling system maintains exceptional temperature uniformity with front-to-rear differentials not exceeding 2°C, safeguarding poultry health and optimizing production performance.

#### Control & Automation

The control cabinet offers multiple protective functions including lightning and phase sequence protection. It enables centralized operation of fans, trolleys, manure belts, and conveyors with both automatic and manual control modes for precise management and emergency response.

#### Technical Support & Services

We provide comprehensive support to ensure your poultry farming business thrives:

- Professional installation guidance
- Regular maintenance and repair services
- Technical troubleshooting assistance
- Training on system operation and poultry management best practices

Each system unit undergoes rigorous assembly and testing in our dedicated electrical control workshop, ensuring strict quality standards and delivering stable, long-term performance for Russian farming operations.
