

Hot-Dip Galvanizing Walkway Platform Layer Chicken Cage System with 700mm Story Height

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Cage Size: 630*650*450mm; 600*650*450mm
- Highlight: **hot-dip galvanizing walkway chicken cage, layer chicken cage system 700mm height, galvanized chicken cage platform walkway**

Product Description

Hot-Dip Galvanizing Walkway Platform Layer Chicken Cage System with 700mm Story Height

Effective management and control are fundamental to modern poultry farming. Automated systems for feeding, drinking, manure removal, egg collection, and environmental control significantly enhance operational efficiency while reducing labor dependency. Farmrob's feeding and drinking systems ensure consistent distribution of nutrients and hydration, improving flock uniformity, minimizing waste, and optimizing resource utilization for substantial cost savings.

System Design & Safety Features

Designed for 6 to 12 tiers, this system includes walkway platforms (3mm, $\phi 6$ twisted steel wire) and stairs with hot-dip galvanized treatment. This integrated access system ensures personnel safety when working at height while providing long-term durability and structural integrity.

Each bird receives ample space allocation, scientifically proven to reduce stress-induced behaviors like feather pecking and aggression. The precision-engineered cage mesh features optimal dimensions to prevent trapping or escape, ensuring both safety and containment. Flexible, smooth bottom nets provide comfortable standing surfaces that prevent foot injuries and promote overall bird well-being.

Environmental Control & Bird Welfare

The 700mm story height, combined with modern environmental control systems including efficient fans, evaporative cooling pads, and air deflectors, ensures uniform distribution of fresh air and balanced humidity across all cage tiers. The system maintains precise temperature regulation while minimizing negative pressure, promoting smooth natural avian respiration and significantly enhancing respiratory comfort in high-density housing conditions.

Biosecurity & Health Management

Each house is equipped with a vaccination cart, enabling segregated flock management. Our equipment significantly reduces cross-contamination and disease transmission risks between tiers. Easy access to each level facilitates rapid, efficient vaccination procedures and supports systematic health monitoring, strengthening overall biosecurity and farm management protocols.

Technical Support & Services

Our high-quality, durable cage rearing system is designed to meet the evolving needs of poultry farmers. We provide comprehensive technical support and services including:

Installation Guidance: Ensuring smooth installation and proper system functionality

Regular Maintenance and Repair Services: Maintaining optimal system performance

Technical Troubleshooting: Rapid resolution of operational issues

Training and Instruction: Comprehensive education on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
