

## Integrated Intelligent Systems Layer Chicken Cage System with High Rearing Density

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Service Life: Over 15 Years
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **intelligent layer chicken cage system, high density chicken cage system, integrated layer chicken cage**

## Product Description

# Integrated Intelligent Systems Layer Chicken Cage System with High Rearing Density

## Advanced Poultry Farming Solution

Farmrob's H-type chicken coop is an innovative multi-tiered cage system that delivers comprehensive advantages for modern poultry farming. The system significantly enhances operational efficiency through high-density rearing and optimized land utilization while promoting animal health by minimizing pathogen transmission.

This automation-friendly design reduces labor demands and centralizes critical environmental controls including ventilation, temperature, and lighting management.

## Smart Technology Integration

The structure is engineered for seamless compatibility with advanced agricultural technologies, enabling straightforward integration of mature intelligent systems. These include:

- Automated feeding and drinking systems
- Real-time monitoring sensors
- Data-driven environmental management
- Precision egg and manure handling systems

This comprehensive integration paves the way for fully connected, smart poultry houses that set new standards for productivity, sustainability, and biosecurity worldwide.

## Key System Advantages

**Durable Construction:** Middle frames are made of Mg-Al-Zn alloy with hot-dip galvanized head and tail frames. These components withstand harsh environments with a service period of up to 15 years. The sliding door facilitates easier inspection and monitoring of flock health.

**Efficient Feeding System:** Mg-Al-Zn alloy feed troughs (thickness: 0.95 and 0.98cm) with patented devices guarantee consistent and uniform feed dispersion along the entire trough length. This eliminates feed pile-up and empty zones, drastically reducing spillage and selective feeding while minimizing waste.

**Advanced Water Management:** Dual water lines equipped with patented nipples ensure reliable access to clean water while significantly reducing waste from leakage and spillage.

**Effective Manure Removal:** The belt-driven manure removal system, paired with durable polyurethane double scrapers, ensures thorough waste evacuation. This combination significantly enhances coop cleanliness, improves overall hygiene, and reduces disease outbreak risks.

## Technical Support & Services

Our high-quality, durable cage rearing system is designed to meet the specific needs of poultry farmers. We provide comprehensive support including:

- Installation Guidance: Ensuring smooth installation and proper system functionality
- Regular Maintenance and Repair Services: Keeping the system in optimal working condition
- Technical Troubleshooting: Quickly resolving any operational issues
- Training and Instruction: Providing comprehensive training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
