

## Abundant Activity Space Cage Free System with Efficient Farm Management

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: Multi-tier Aviary System
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling System, Automatic Manure Removal System
- Trading Methods: FOB, CFR, CIF, EXW
- Highlight: **cage free poultry farming system, efficient farm management system, abundant activity space poultry**

## Product Description

### Abundant Activity Space Cage Free System with Efficient Farm Management

Globally, the transition to cage-free systems is widely recognized as a leading and progressive practice within modern layer farming. To meet this growing demand, Farmrob designs and manufactures equipment that fully aligns with the most current animal welfare standards.

Our welfare-oriented equipment is engineered to provide a safe, secure, and low-stress environment. This is achieved through precise environment control and robust construction utilizing high-end, durable materials, ensuring superior structural strength and long-term corrosion resistance for reliable performance. Furthermore, our commitment to continuous design refinement and innovation prioritizes operational durability, resulting in minimal failure.

Our equipment is designed to actively support the natural behaviors of hens. It creates abundant space for free movement, allowing birds to fully express their innate behaviors such as perching, foraging, climbing, and moving freely, truly enabling them to stretch, jump, and explore their surroundings. Farmrob's cage-free system exemplifies this philosophy, offering ample, accessible space. This integrated approach ensures both enhanced animal well-being and optimal farm management, positioning our systems at the forefront of ethical and efficient poultry production.

#### Key System Features

**Enhanced Animal Well-being:** Meticulously designed, easily accessible water and feed lines deliver consistent abundance. Our innovative open-frame structure promotes maximum airflow, providing natural ventilation for optimal health, vitality, and performance.

**Automatic Nest Management:** The system features an automatic nest closure setting. After laying, the nest door closes gently to discourage hens from remaining inside, effectively preventing broodiness and maintaining consistent laying cycles. This integrated control mechanism significantly reduces manual intervention, leading to substantial labor savings.

**Stress-Reduced Laying Environment:** Each nesting box is fitted with red curtains at the entrance. These curtains block light and external disturbances, creating a secluded, dim, and comfortable private space for hens, greatly minimizing stress during egg-laying.

**Egg Protection & Hen Comfort:** Inside each box, a specially designed soft and smooth nest pad is installed. Its carefully contoured surface ensures eggs roll away gently and controllably from the laying area into the collection channel, effectively reducing egg cracks. The plush padding also provides essential protection for the hen's abdominal skin and keel bone, preventing abrasions and supporting overall animal welfare.

#### Technical Support & Services

Our cage-free rearing system is a high-quality, durable solution designed to meet the needs of modern poultry farmers. We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.

Installation Guidance: Ensuring smooth installation and proper functionality of the system

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any issues encountered during use

Training and Instruction: Providing training on system usage and best practices in poultry management
