

Detail-oriented Layer Chicken Cage System in Vietnam Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **layer chicken cage system Vietnam, detail-oriented chicken cage farm, poultry farming cage system Vietnam**

Product Description

Detail-oriented Layer Chicken Cage System in Vietnam Farms

With decades of research and development experience, we specialize in providing advanced poultry farming systems tailored to the unique needs of farm owners worldwide. Our team develops customized solutions that account for local climate conditions, socio-economic factors, and existing infrastructure, ensuring optimal performance and sustainability in every environment.

At the heart of our systems is a commitment to animal welfare and productivity. Our equipment ensures ample access to feed and water so that every chicken can meet its daily nutritional requirements consistently. We create comfortable living environments with sufficient lighting, which significantly reduces stress levels and minimizes aggressive behavior, fostering flock harmony and supporting healthier growth.

System Features & Components

Cage Frame Construction

Constructed with premium Al-Zn-Mg alloy, engineered for exceptional durability and superior corrosion resistance. This high-performance material withstands demanding farm environments, ensuring structural integrity and reliable performance year after year, with an operational lifespan exceeding 15 years with minimal maintenance.

Manure Removal System

Features a hot-dip galvanized base for robust structural support and superior rust resistance in high-humidity environments. The patented design incorporates a plastic-nylon spiral drive wheel that actively guides the belt to prevent derailment while efficiently clearing accumulated waste. The poultry manure belt operates in complete isolation from the chicks, minimizing contamination risk.

Feed Trough Design

Made of high-strength Al-Zn-Mg alloy plate for superior rigidity and corrosion resistance. Reinforced with integrated metal buckles that fasten directly to the trough, ensuring even force distribution across the entire cage structure. This enhances overall strength and stability while minimizing deformation under load.

H Type Layer Chicken Cage Benefits

- Automatic control systems for precision management
- Chicken-oriented design prioritizing animal welfare
- Simplified management with low labor requirements
- Ample activity space for healthy movement
- Double water line and sufficient feeding positions
- High feed conversion ratio for optimal efficiency
- Easy to operate and maintain systems
- Comfortable environment with fresh air circulation
- Space-efficient design saving investment costs
- Reduced morbidity and mortality rates
- Large-scale breeding capability with economic benefits
- Even illumination and gentle ventilation systems
- Anti-aging materials for long-term durability

Technical Support & Services

Our high-quality, durable cage rearing system is designed to meet the specific needs of poultry farmers. We provide comprehensive technical support and services including:

- **Installation Guidance:** Ensuring smooth installation and proper system functionality
- **Regular Maintenance & Repair:** Keeping systems in optimal working condition
- **Technical Troubleshooting:** Quick resolution of operational issues

- **Training & Instruction:** Comprehensive training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive and achieve sustainable success.
