

Supporting Natural Chicken Instincts Cage Free System with Comfortable Environment

Our Product Introduction

for more products please visit us on farmrob.com

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: Cage-free System
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm
- Highlight: **cage free chicken system, comfortable chicken environment, natural chicken instinct system**

Product Description

Cage Free Poultry System: Supporting Natural Chicken Instincts

The multi-layer welfare breeding system represents a significant advancement in ethical poultry farming, designed to promote both the physical and behavioral well-being of chickens. This model ensures that birds receive ample space and freedom of movement, satisfying their fundamental physiological and instinctual needs, such as perching, foraging, and nesting.

System Features & Benefits

- Strategically positioned perching poles for natural resting behavior
- Multi-level activity platforms encouraging natural movement
- Secluded egg-laying nests reducing stress and competition
- Efficient multi-layer egg collection belt mechanism
- Automated egg collection ensuring hygiene and product quality
- Eliminates eggs laid outside designated nesting areas
- Reduces egg damage and manual labor requirements

Advanced Manufacturing & Construction

Farmrob processes raw materials using advanced machinery including laser cutting. Key structural components are manufactured internally from 440 Mg-Al-Zn alloy (10% Al, 3% Mg), featuring smooth surfaces engineered for high load-bearing capacity and strong resistance to deformation.

Automated Egg Management

The nest closure device gently guides eggs to a central collection area, ensuring secure recovery while minimizing breakage. An automated mechanism lifts the nest entrance nightly, preventing hens from roosting inside and effectively discouraging incubation behavior to maintain consistent laying productivity.

Technical Support & Services

Our comprehensive support package ensures optimal system performance and includes:

- Installation Guidance:** Ensuring smooth installation and proper functionality
- Regular Maintenance & Repair:** Keeping the system in optimal working condition
- Technical Troubleshooting:** Quick resolution of operational issues
- Training & Instruction:** Best practices in poultry management and system usage

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive with our durable, high-quality cage-free rearing system.
