

## Ample Space and Hygienic Conditions Poultry Battery Cage System to Promote Pullet Health and Growth

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type pullet cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700 Mm
- Highlight: **poultry battery cage system for pullets, hygienic poultry cage system, spacious battery cage for poultry growth**

## Product Description

### Ample Space and Hygienic Conditions Poultry Battery Cage System

Farmrob's fully automatic H-type pullet cage system is engineered to create a spacious, comfortable, and highly hygienic environment that supports healthier, more uniform growth and enhances overall pullet well-being. The system offers customizable configurations from 3 to 8 tiers, allowing precise adaptation to your facility's layout and production objectives.

#### Optimal Bird Housing Specifications

Each pullet cage is optimized to house 11 birds, providing a generous unit area of 327 cm<sup>2</sup> per pullet. This carefully calculated density ensures ample space for movement and development during the critical 0 to 105-day rearing period, creating the ideal foundation for uniform growth and robust bird health.

### Advanced Control and Management Systems

#### Electrical Control Cabinet

The centralized intelligence hub delivers powerful and stable performance with both fully automatic and manual operation modes. Automatic mode ensures precise, schedule-driven management while manual override provides direct control for maintenance or emergencies.

#### Ventilation and Cooling System

This critical system maintains consistently comfortable environments by providing fresh air and optimal humidity levels. The comprehensive integration includes precision-engineered fans, high-efficiency cooling pads, and corrosion-resistant air inlets that work in concert to remove excess moisture and airborne contaminants while delivering oxygen-rich air throughout all production stages.

### Fully Automated Systems Integration

- Automatic feeding system
- Automatic drinking system
- Automatic manure removal system
- Automatic ventilation and cooling system
- Automatic control system
- Heating system

By integrating advanced smart automation, Farmrob streamlines daily routines, reduces labor requirements, and ensures consistent, high-quality care throughout every development stage, ultimately optimizing bird performance and maximizing farm efficiency.
