

Automatic Feeding and Watering for Pullet Poultry Battery Cage System with Comfortable Environment

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic pullet cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700 Mm
- Highlight: **automatic poultry feeding system,
pullet battery cage watering,
comfortable poultry cage environment**

Product Description

Automatic Feeding and Watering Pullet Poultry Battery Cage System

Farmrob specializes in innovative poultry rearing solutions, designing automated systems that enhance modern poultry production and maximize operational productivity. We provide customized poultry house planning to address region-specific challenges and deliver high-performance solutions for poultry producers worldwide.

System Configuration

Available in flexible configurations with 3 to 8 tiers to accommodate different farm sizes and production requirements.

Optimal Pullet Development Environment

Designed to provide a stress-free and comfortable living environment with integrated automated feeding and watering systems that ensure easy access to evenly distributed feed and clean water.

Safety and Hygiene Features

- Proper mesh grid prevents chickens from becoming trapped while allowing manure to pass through
- Minimizes bacterial residue and maintains cleanliness
- Provides ample space for natural movement and comfort
- Smooth surfaces and welded joints prevent injury to birds' feathers or skin

Structural Integrity

High-strength frame constructed from Al-Mg-Zn alloy steel ensures long-term structural integrity, preventing deformation or collapse while providing a stable and secure environment.

Environmental Control Systems

Age-appropriate temperature settings accommodate different growth stages. The ventilation and cooling system ensures continuous fresh air circulation while maintaining temperature fluctuations within a narrow 1-2°C range for a stable, healthy environment.

Humidity Management

Proper humidity control is essential for bird health. Our system prevents high humidity that hinders heat dissipation and breathing, while controlling low humidity to reduce airborne dust that can irritate respiratory tracts.

Key Benefits

- Improve environmental hygiene and cleanliness
- Maintain optimal chicken health and welfare
- Enhance farm management efficiency
- Environmental protection and resource utilization
- Improvement of egg production performance

Technical Support and Services

Our high-quality, durable cage rearing system is designed to meet the specific needs of poultry farmers. We provide comprehensive support including:

1. **Installation Guidance:** Ensuring smooth installation and proper system functionality
2. **Regular Maintenance and Repair Services:** Keeping the system in optimal working condition
3. **Technical Troubleshooting:** Quickly resolving any operational issues
4. **Training and Instruction:** Providing comprehensive training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive and achieve sustainable profitability.
