

3-6 tiers Layer Chicken Cage System for Algerian Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic pullet cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm

Product Description

3-6 tiers Layer Chicken Cage System for Algerian Farms

Engineered by Farmrob's technical team, this product reflects a deep commitment to innovation and precision craftsmanship. Its development follows an efficient operation that guarantees both high performance and long-term reliability. With a rugged and durable construction, the system offers outstanding stability and sustained functionality, making it well suited for the most demanding applications.

Durability and Stability: Manufactured in our own factory with advanced laser cutting and bending techniques, the middle supports deliver strong load-bearing capacity and outstanding deformation resistance. Ongoing design optimization greatly minimizes the failure rate.

Easy transfer: The sliding cage door allows for easy transfer and convenient chick management. Designed to prevent injury and escape, our cage ensures the birds remain safe and secure.

Improved Hygiene and Bird Health: Automatic and properly designed ventilation and waste management systems significantly enhance the living environment. By ensuring continuous airflow and efficient waste removal, these features help reduce harmful gases, control humidity, and limit pathogen buildup. As a result, the rate of disease transmission is effectively lowered, promoting overall flock health and productivity.

Low labor: Mechanized operation reduces manual work with automatic system. Just 2 or 3 staffs can manage whole coop. Furthermore, when combined with Internet of Things (IoT) technology, our system enables digital farming management, allowing real-time monitoring, automated data collection, and remote control of key environmental parameters. This integration not only lowers labor costs but also improves overall farm efficiency and decision-making.

Benefits

1. Improve environmental hygiene
2. Maintain chicken health
3. Enhance farm management efficiency
4. Environmental Protection and Resource Utilization
5. Improvement of egg production
6. Minimize egg breakage and cracks
7. Reduce labor costs
8. Extend equipment service life
9. Support biosecurity management

Support and Services:

The cage rearing system is a high-quality, durable, which designed to meet the needs of poultry farmers.

The technical support and services we offer include:

1. Installation Guidance: Ensuring smooth installation and proper functionality of the system.
2. Regular Maintenance and Repair Services: Keeping the system in optimal working condition.
3. Technical Troubleshooting: Quickly resolving any issues encountered during use.
4. Training and Instruction: Providing training on system usage and best practices in poultry management.

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
