

Healthy Poultry Activities Layer Chicken Cage System in Vietnamese Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Tier Height: 700 Mm

Product Description

Healthy Poultry Activities Layer Chicken Cage System in Vietnamese Farms

Advanced Poultry Farming Solutions

As a long-standing provider of poultry farming solutions, Farmrob specializes in engineering and delivering high-performance equipment and automated rearing systems designed to optimize modern poultry production and drive productivity. We offer integrated solutions that span from feeding and watering to climate control and manure management.

Each system is crafted to enhance operational efficiency, reduce labor costs, and ensure the health of the poultry, ultimately helping farmers achieve higher yields with greater reliability.

Premium Construction Features

Durable Cage Mesh: Manufactured from high-quality Q235 aluminum-zinc alloy (containing 10% aluminum), offering excellent corrosion resistance. The burr-free surface and elastic properties help minimize egg breakage rates.

Optimal Grid Design: Appropriately sized grid design prevents chickens from getting stuck, escaping, or falling out, thereby supporting their normal activities.

Water Management System: The water line terminator allows for easy water level observation and is connected to end drainage to prevent water spillage. It facilitates convenient monitoring of water pressure and helps determine whether the pipeline has adequate water supply.

Egg Collection Excellence

Professional design ensures a zero egg-breaking rate. The stable, low-failure egg lift, equipped with egg leakage and egg selection devices, requires minimal maintenance. The high-end PP egg belt features a low extension rate and minimal contraction or expansion, resulting in a long lifespan.

Hygienic Manure Management

The manure belt is completely isolated from the chickens, ensuring a clean and hygienic environment while minimizing cross-contamination between waste and birds. Manure falls directly through the mesh grid, keeping the cages clean.

This effective isolation reduces disease transmission from contaminated manure and significantly lowers chicken mortality rates.

Optimal Environmental Control

Given the house's excellent insulation, heat retention, and airtightness, our ventilation and cooling system maintains a comfortable indoor environment with a temperature differential of no more than 3°C. It ensures continuous air circulation, effectively removing stale air, facilitating normal heat dissipation, and delivering a consistent supply of fresh air.

Technical Support & Services

Our cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. We provide comprehensive technical support and services including:

Installation Guidance: Ensuring smooth installation and proper functionality of the system

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any issues encountered during use

Training and Instruction: Providing training on system usage and best practices in poultry management

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
