

H Type Laying Ducks poultry battery cage system 8 tiers

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: CE
- Model Number: H type automatic laying duck equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Tier Height: 700 Mm

Product Description

H Type Laying Ducks Poultry Battery Cage System - 8 Tiers

The laying duck cage is specially designed for modern commercial farms and can reach up to 8 tiers, dedicated to creating a healthy growing environment that ensures stable egg production. By maximizing vertical space, this multi-tier system allows farmers to significantly increase flock density without expanding floor space, making it an ideal solution for land-scarce or high-density farming regions.

Through scientific structural design and automated configurations, including efficient feeding, drinking, egg collection, and manure removal systems, labor demand and daily operating costs are greatly reduced. The design also minimizes the risk of disease transmission and floor-laid egg breakage, further improving egg quality and hatchability.

As a result, farmers can achieve more consistent output, lower breakage rates, and better biosecurity. These integrated advantages help you achieve higher returns, reduce long-term operational risks, and enhance the core competitiveness of your farm in an increasingly demanding market.

Key Features

The combination of sturdy middle support and mature technology and design guarantee a durable, reliable cage that requires minimal maintenance

The egg collection system operates reliably with a low failure rate, offering a low egg breakage rate and a high degree of automation

The hot-dip galvanized silo offers excellent moisture resistance, thermal insulation, and corrosion resistance, effectively preserving feed nutrition and preventing spoilage

The fully automatic drinking system features high-efficiency filtration and precise medication dosing, delivering clean, ample drinking water to each cage

Each cage measures 300×500mm with a 470mm cage height, accommodating 2 ducks with ample space

The front manure removal system features a patented plastic nylon spiral drive wheel, designed to prevent belt misalignment and efficiently remove accumulated manure. The belt bracket is constructed from Al-Zn-Mg alloy, offering superior anti-corrosion performance. Its side plates feature a smooth surface finish to prevent scratching or damaging the manure belt during operation

Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. The technical support and services we offer include:

Installation Guidance: Ensuring smooth installation and proper functionality of the system

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any issues encountered during use

Training and Instruction: Providing training on system usage and best practices in poultry management

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
