

8 Tiers Laying Duck Cage Poultry Battery Cage System for Efficient Management and Control

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001
- Model Number: H type automatic laying duck equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Cage Size: 300mm *500mm *470mm(L*D*H)

Product Description

8 Tiers Laying Duck Cage Poultry Battery Cage System for Efficient Management and Control

Farmrob understands that every poultry farm operates under unique conditions. Therefore, we tailor our solutions to meet the specific needs of each client, taking into account key factors such as local weather patterns, humidity levels, farm scale, and other environmental variables. By carefully analyzing these elements, we are able to recommend and deliver the most suitable automation systems. Our mission is simple yet steadfast: to help farm owners rear their flocks with ease, reduce manual labor, improve operational efficiency, and ultimately maximize their profits.

System Overview

Efficient Management and Control

Essential foundations for success in modern poultry farming through integrated automated systems for feeding, drinking, manure removal, egg collection, and environmental regulation.

Duck Health Maintenance

Consistent and reliable access to feed and clean water is fundamental to supporting growth and egg production while preventing growth discrepancies.

Feeding and Drinking Systems

Achieve uniform distribution of nutrients and water, effectively reducing waste and ensuring equal access to essential resources for all ducks.

Resource Optimization

Precise control of feed and water usage significantly improves resource utilization, reduces costs, and benefits the environment.

High-Performance Manure Removal System

Our advanced manure removal system features a high-performance motor that guarantees smooth and reliable operation. The hot-dip galvanized base provides outstanding corrosion resistance and long-term structural strength. Equipped with a nylon spiral drive wheel, the system efficiently removes accumulated manure while maintaining proper alignment of the manure belt. In addition, the manure belt is completely isolated from the chicks, significantly reducing the risk of contamination and supporting a cleaner, healthier rearing environment.

Why Choose Farmrob?

Farmrob has more than 20 years of poultry farming experience and mature systems.

Customized construction and project design and engineering solutions

Reasonable and cost-effective quotation

Chicken-oriented and animal-friendly equipment

Advanced technical equipment with 25-year lifespan

Provide installation and technical guidance

Training for farmers on proper bird care and equipment maintenance

Thoughtful service and perfect after-sales service system
