

## Smart Control Technologies Layer Chicken Cage System with Excellent Production Performance

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Cage Size: 1800\*650\*450mm
- Tier Height: 700 Mm

## Product Description

### Smart Control Technologies Layer Chicken Cage System with Excellent Production Performance

As a leading provider of poultry rearing solutions, Farmrob specializes in innovating, designing, and continuously improving automatic systems to enhance modern poultry production and maximize operational productivity. Our innovative solutions are expertly engineered to address diverse regional challenges, ensuring customized, reliable performance for poultry producers worldwide.

Beyond automation, Farmrob integrates real-time monitoring and data-driven insights into systems, helping farm owners reduce labor costs, minimize mortality rates, and optimize feed conversion efficiency. By combining rugged engineering with smart control technologies, we empower farm owners to achieve consistent flock health and higher returns, regardless of their operating environment.

From small-scale family farms to large commercial operations, Farmrob provides end-to-end support including training and installation guidance.

#### Feeding and Drinking Systems

Farmrob's product lineup features fully automatic systems, including advanced feeding and drinking solutions designed to ensure a consistent, reliable, and hygienic supply of water and feed for your chickens at all growth stages.

The feeding troughs are precision-engineered with optimal dimensions specifically suited for laying hens, combining high mechanical strength with exceptional anti-corrosion performance. This robust construction minimizes wear and tear over time, reduces the need for frequent replacements, and supports a clean feeding environment, contributing directly to better flock health and feed conversion rates.

Complementing the feeding system, Farmrob's drinking nipples incorporate a specially designed sealing mechanism that effectively prevents water leakage. This leak-proof design not only conserves water and keeps litter dry, but also significantly reduces the risk of bacterial growth in the poultry house, resulting in improved hygiene standards.

Together, these fully integrated feeding and drinking systems reflect Farmrob's commitment to durability, biosecurity, and automation excellence in modern poultry rearing.

A major benefit of our layer rearing system is its exceptional efficiency. The innovative cage design optimizes space utilization, ensuring a comfortable environment where chickens can thrive, resulting in both stable egg production and improved overall flock health.

#### Why Choose Farmrob?

**Customized Construction:** Project design and engineering solutions tailored to your needs

**Cost-Effective:** Reasonable and competitive pricing

**Poultry Health Focused:** Chicken-oriented and animal-friendly equipment

**Durability:** Advanced technical equipment with 25-year lifespan

**Professional Support:** Installation and technical guidance

**Comprehensive Training:** Instruction for farmers on proper bird care, equipment use, and maintenance

**Exceptional Service:** Thoughtful support and perfect after-sales service system

With over 20 years of poultry farming experience and mature systems, Farmrob delivers proven solutions that maximize your operational efficiency and profitability.
