

Automatic Feed and Water Delivery Layer Chicken Cage System for Vietnam Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm

Automatic Feed and Water Delivery Layer Chicken Cage System for Vietnam Farms

System Overview

H-Type Automatic Layer Battery Cage is constructed from high-quality materials for exceptional durability and safety. The sturdy wire mesh design ensures chickens remain securely enclosed while the fully automated system integrates feed delivery, watering, egg collection, and manure removal functions. This comprehensive automation minimizes manual effort while maintaining a clean, healthy environment for layers. Easy to install and maintain, the H-Type cage system helps farmers improve productivity and profitability through efficient, large-scale layer management.

Key Advantages

Centralized Management: Enables more efficient use of energy and labor resources through integrated control systems, reducing manual intervention through scheduled operations and optimal resource allocation for cost savings and increased productivity.

Even Feed Distribution: Maintains chicken uniformity and promotes healthy body conditions by ensuring each bird receives consistent nutrition at regular intervals, minimizing competition and supporting consistent weight gain and flock homogeneity.

Hygienic Living Environment: Cage design and automated manure removal system create a friendly, hygienic environment by reducing bird contact with waste, lowering ammonia levels, and limiting pathogen spread for cleaner air and healthier birds.

Optimized Energy Efficiency: Advanced climate control and energy-saving motors maintain ideal conditions while using less power. Modern egg collection systems with gentle belt conveyors and cushioned transfer points keep egg breakage rates remarkably low.

Complete Automation: Control system fully automates feeding, egg collection, manure removal, ventilation, and lighting with real-time monitoring, alarm notifications, and data tracking for reduced labor demands and improved consistency.

Support & Services

Our high-quality, durable cage rearing system is designed to meet the specific needs of poultry farmers. We provide comprehensive technical support and services including:

- Installation Guidance for smooth setup and proper functionality
- Regular Maintenance and Repair Services to maintain optimal performance
- Technical Troubleshooting for quick resolution of operational issues
- Training and Instruction on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive and succeed.
