

## Durable Construction Layer Chicken Cage System with Enhanced Poultry Performance

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: Automatic H-type Layer Equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700mm

## Product Description

### Durable Construction Layer Chicken Cage System with Enhanced Poultry Performance

Farmrob is deeply committed to being chicken-oriented, placing the good behavior and health of poultry at the core of every design. We strive to provide durable, reliable, and long-lasting products that farm owners can trust for years of continuous operation.

Our poultry rearing systems are not only highly functional but also feature a clean, smooth surface and a scientifically optimized layout that promotes easy cleaning and maintenance. Every detail is carefully engineered to reduce stress on the birds and improve daily management efficiency for farmers.

By incorporating advanced technologies, such as automated feeding, drinking, and climate control, our systems significantly enhance poultry development while maximizing productivity. Whether the goal is broiler rearing or high-quality egg production, Farmrob's solutions create a secure, sanitary, and highly efficient environment that supports the health and performance of your chickens.

From system layout to material selection, everything is designed with the birds' needs and the farmer's success in mind.

#### Key Features

##### Labor Cost Reduction

The fully automatic system integrates feeding, drinking, manure removal, egg collection, and environmental control into one seamless operation. This comprehensive automation significantly reduces the need for manual intervention, thereby greatly lowering workers' labor costs. By minimizing routine tasks such as feed distribution, waste clean, and climate adjustment, farmers can reallocate labor resources to more critical management activities.

##### Advanced Equipment

Made from Al-Mg-Zn alloy-coated wire, our cages offer outstanding corrosion resistance and a service life of over 25 years. That is why cages remain the preferred choice for industrial and intensive poultry farming, delivering durability, efficiency, and long-term value.

##### Investment Savings

H-frame layer chicken cages are designed to achieve high rearing density and a high degree of intensification, making them an ideal solution for modern commercial egg production. By optimizing the vertical and horizontal space within the poultry house, the H-frame system allows farmers to house significantly more birds per square meter compared to traditional rearing methods.

##### Medicine Cost Reduction

The H-type layer chicken cage features a fully enclosed breeding mode that separates humans from chickens, greatly improves the poultry house environment, and reduces both the invasion of foreign diseases and bird mortality.

#### Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. The technical support and services we offer include:

Installation Guidance: Ensuring smooth installation and proper functionality of the system

Regular Maintenance and Repair Services: Keeping the system in optimal working condition

Technical Troubleshooting: Quickly resolving any issues encountered during use

Training and Instruction: Providing training on system usage and best practices in poultry management

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
