

## Stable Egg Collection and Effective Manure Removal Layer Chicken Cage System for the Southeast Asian Market

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type automatic layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Tier Height: 700 Mm

## Product Description

### Stable Egg Collection and Effective Manure Removal Layer Chicken Cage System for the Southeast Asian Market

Farmrob H-type layer rearing equipment is specifically designed for modern commercial egg production farms. This advanced system integrates a range of automated features, including an automatic feeding trolley, an automatic egg lifting and collection system, an automatic manure removal device, a lighting system, and an intelligent environmental controller.

Together, these components enable full automation for the modern chicken farm, significantly improving operational efficiency, reducing labor costs, and ensuring optimal living conditions for the laying hens. With Farmrob H-type equipment, farmers can achieve precise management of feeding, drinking, egg collection, waste removal, and climate control, all through a centralized control system. This makes it an ideal solution for large-scale, high-performance layer operations seeking reliability and long-term productivity.

#### Fully Automatic Layer Equipment Features

Wire: Q235 Al-Zn alloy without burrs, good elasticity

Smooth egg rolling: 7.5° elastic bottom net

Door: Sliding door, easy operation convenient to catch chickens

700 mm tier height ensures every chicken receives adequate fresh air and sufficient lighting

Convenient to observe the situation of the chickens

Manure belt won't deviate. Driven spiral roller reduces accumulated manure. Automatically manure system, effectively reducing the labor and infection rate

Stable egg collection system lower the broken egg rate and reduce labor costs

Fully automatic system help you to achieve fine management

Mature environmental systems help you rear chicks safely and easily

#### Maintenance-free and easy-to-operate rearing equipment

Our rearing equipment is engineered for minimal maintenance, significantly reducing downtime and labor costs. The user-friendly design ensures that farm staff can operate the system with ease, even without specialized technical backgrounds, allowing you to focus more on core farming activities.

#### Thoughtful service and a perfect after-sales service system

We are committed to delivering thoughtful, customer-centric service at every stage of your journey. Our comprehensive after-sales service system includes prompt technical support, readily available spare parts, and proactive follow-up to ensure your equipment continues to perform optimally for years to come.

#### Technical training and installation guidance

To help you maximize the value of your investment, we provide thorough technical training for your team, covering daily operation, preventive maintenance, and troubleshooting. In addition, our experienced engineers offer on-site or remote installation guidance to ensure a smooth, efficient setup process tailored to your farm's specific layout and requirements.
