

Performance And User Friendly Layer Chicken Cage System Supporting Modern Poultry Farming Requirements

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H-type layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Cage Size: 1800*650*450

Product Description

Performance And User Friendly Layer Chicken Cage System

Through dedicated R&D and close collaboration with renowned universities, Farmrob has developed an innovative poultry farming solution that specifically addresses the demands of modern, large-scale layer operations and welfare systems. As one of the top three companies in China's poultry equipment sector, Farmrob has earned the trust of clients by delivering reliable, high-performance products and mature, end-to-end farming solutions. To date, we have successfully served over 5,000 clients, reflecting our deep industry expertise and commitment to customer satisfaction.

Farmrob's fully automatic layer rearing equipment is widely recognized for its efficiency and advanced features, empowering the future of smart farming with data-driven automation and optimized bird welfare. Designed with user convenience in mind, we provide debugging and installation guidance. Whether you need a standard or customized chicken layer cage, you can easily set it up in your poultry farm with minimal time and effort, reducing labor costs and accelerating your path to higher productivity.

System Features

Complete Automation: The fully automatic system integrates five essential functions—feeding, drinking, manure removal, egg collection, and environmental control—into an intelligent workflow. This comprehensive automation drastically reduces manual intervention, lowering labor costs while improving consistency and biosecurity. Farmers can reallocate workforce to critical activities like health monitoring and production optimization.

Durable Construction: Our cages are manufactured using high-strength Al-Mg-Zn alloy wire, chosen for exceptional resistance to corrosion, moisture, and ammonia exposure. This robust construction ensures a service life of over 25 years, significantly outlasting conventional galvanized alternatives. The durable design minimizes replacements and maintenance, providing sustained value for modern egg production.

Optimized Environment: Through precise engineering of the environmental control system and a tier height of 700mm, Farmrob ensures consistently fresh air and stable temperature throughout the poultry house. The well-designed ventilation system delivers faster, more uniform airflow, effectively reducing negative pressure. Ample vertical space improves light penetration for easier visual inspection, creating superior living conditions that contribute to higher production rates and reduced mortality.

Support and Services

Our cage rearing system is designed to meet the needs of poultry farmers with high-quality, durable equipment. We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.

Installation Guidance: Ensuring smooth installation and proper functionality

Regular Maintenance and Repair Services: Keeping the system in optimal condition

Technical Troubleshooting: Quickly resolving operational issues

Training and Instruction: Providing system usage and poultry management best practices
