

Structural Strength Layer Chicken Cage With Anti-Corrosion Performance

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: L/C,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Cage Size: 1800mm*650mm*450mm
- Birds/cell: 9

Product Description

Structural Strength Layer Chicken Cage With Anti-Corrosion Performance

Our Chicken-First Philosophy

Farmrob is dedicated to a "chicken-first" philosophy. We believe that when poultry thrive, productivity and profitability naturally follow. This foundational blueprint guides every stage of our design, engineering, and manufacturing processes. We don't simply build cages; we craft holistic living environments where hens can enjoy optimal comfort and experience minimal stress, recognizing that bird welfare is inseparable from sustainable farming success.

Structural Integrity & Durability

Central to our commitment is the structural integrity of our layer cages. Fabricated from premium high-strength alloy, each cage system undergoes rigorous stress-testing to guarantee exceptional sturdiness and long-term durability. Unlike conventional materials that weaken or deform over time, our alloy composition resists cracking and fatigue—even under the load of commercial-scale operations.

These cages are purpose-engineered to withstand the harshest climatic extremes, from scorching subtropical humidity to freezing winter winds. An anti-corrosion surface treatment ensures that rust and oxidative decay never compromise the system, preserving structural safety for decades with minimal maintenance demands.

Customized Solutions & Support

We tailor every installation to the unique cultural, environmental, and operational needs of our clients. We don't just export equipment; we transfer knowledge, provide on-site technical support, and co-develop solutions that resonate with local farming traditions while elevating them through innovation.

H Type Battery Chicken Cage Features

Centralized management enables significantly more efficient utilization of both energy and labor resources, reducing manual intervention and operational costs.

Even and consistent feed distribution ensures uniform nutrient intake across the entire flock, essential for maintaining chicken uniformity and promoting overall healthy body condition.

Thoughtful cage and manure system design maintains a clean, hygienic, and bird-friendly environment while reducing ammonia buildup and harmful pathogen proliferation.

Optimized energy efficiency lowers operational overhead and enhances egg production rates, while advanced egg collection systems minimize breakage for higher yields of premium-grade eggs.

Support and Services

Our cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. The technical support and services we offer include:

Installation Guidance: Ensuring smooth installation and proper functionality

Regular Maintenance and Repair Services: Keeping the system in optimal condition

Technical Troubleshooting: Quickly resolving any operational issues

Training and Instruction: Providing comprehensive training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
