

Operational Cost Reduction Poultry Battery Cage System For Indonesian Poultry Farms

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H-type pullet equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: T/T,D/P
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Story Height: 700 Mm
- Cage Size: 1800*600*450mm
- Highlight: **poultry battery cage system for farms, operational cost reduction poultry cage, Indonesian poultry farm cage system**

Product Description

Operational Cost Reduction Poultry Battery Cage System For Indonesian Poultry Farms

Product Overview

The primary competitive advantages of Farmrob's H-type pullet cages lie in their performance and industry-leading automation. By optimizing vertical tier configurations, these systems enable a significantly higher stocking density per square meter of floor space, allowing producers to maximize output without expanding their land.

To address the inherent risks of high-density housing, including heat stress, ammonia accumulation, and disease transmission, our H-type cages are engineered with precision ventilation systems and advanced manure removal systems that maintain optimal air quality and thermal comfort at every tier level.

Our automated environmental control units continuously monitor temperature, humidity, and airflow, making real-time adjustments to ensure that even at maximum capacity, each bird experiences a stable and stress-reduced environment. Farmrob transforms the potential drawbacks of intensive farming into operational strengths, delivering measurable improvements in feed conversion rates and flock uniformity.

Key Features & Design Advantages

Structural Integrity

- Middle support fabricated in-house at Farmrob's metal workshop with full quality control
- Constructed from high-grade Mg-Al-Zn alloy for exceptional load-bearing strength
- Resistance to creep and deformation under sustained heavy loads
- Smooth surface prevents injuries to birds and enhances worker safety

Ventilation & Environmental Control

- 700mm story height and 450mm cage height promote natural convection and heat dissipation
- Prevents localized hot spots and ensures uniform airflow across all tiers
- Effectively mitigates heat stress, keeping chickens comfortable in warmer conditions

Biosecurity & Health Management

- 13-15 cm gap between manure belt and top net serves as critical biosecurity barrier
- Minimizes direct contact and reduces airborne pathogen transmission
- Lowers ammonia exposure for cleaner, healthier housing environment

Technical Support & Services

Our high-quality, durable cage rearing system is designed to meet the needs of modern poultry farmers. We provide comprehensive support including:

- Installation Guidance:** Ensuring smooth installation and proper functionality
- Regular Maintenance & Repair Services:** Keeping systems in optimal working condition
- Technical Troubleshooting:** Quickly resolving operational issues
- Training & Instruction:** Providing training on system usage and poultry management best practices

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
