

## Multi-Tier Robust Structure Poultry Battery Cage System Suitable for Large Poultry Farms

Our Product Introduction

### Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H type pullet cage
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: T/T,D/P
- Supply Ability: 50000 sets per month

### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling System, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Cage Size: 1800\*600\*450mm
- Story Height: 700 Mm
- Highlight: **multi-tier poultry battery cage system, robust structure poultry cage, large farm poultry battery cage**

## Product Description

# Multi-Tier Robust Structure Poultry Battery Cage System Suitable for Large Poultry Farms

## H-Type Fully Automatic Pullet Cage Equipment

Designed for efficiency and longevity, our H-type fully automatic pullet cage system is the ideal solution for modern, high-density poultry operations. Engineered with a robust structure, this system supports configurations ranging from 3 to 8 tiers, offering exceptional scalability to suit farms of varying sizes, from medium-scale enterprises to large industrial complexes.

Constructed from high-grade Al-Zn-Mg alloy plate and Al-Zn alloy wire, the equipment delivers outstanding resistance to corrosion, wear, and environmental stress. The entire structure features a coating thickness of 275g/m<sup>2</sup>, ensuring long-term durability. All plastic components are manufactured from 100% virgin, unused PP material, guaranteeing safety, hygiene, and structural integrity over years of use.

## Advanced Watering System

Each tier is equipped with a dual waterline system, fitted with patented, high-performance nipples and cups. This design guarantees a constant supply of fresh, clean water while virtually eliminating spillage and wastage, reducing manure moisture. The water pipe height is fully adjustable, allowing precise alignment with bird growth stages, from chick to pre-lay, promoting optimal hydration and bird health.

## Precision Ventilation & Climate Control

To support healthy flock performance, our system integrates a scientifically designed ventilation and cooling network. This ensures exceptional temperature uniformity throughout the house, with a maximum front-to-rear temperature differential of only 2°C, even in large-span poultry houses. This level of climate consistency minimizes heat stress, supports feed conversion efficiency, and enhances overall flock uniformity.

## User-Friendly Management Features

The cage front is fitted with a spring-loaded swing door mechanism, enabling quick, one-hand operation for vaccination, health inspections, and bird handling. This design reduces stress on both birds and staff, while ensuring safe, secure transfer of pullets during rearing and moving periods. Combined with fully automated feeding, manure removal, and egg collection options (where applicable), this system significantly reduces labor demands and operational costs.

Ideal for producers seeking reliability, biosecurity, and high performance, our H-type pullet cage equipment is standardized design, built to deliver consistent results, from brooding through to point-of-lay.

## Pullet Cage Features

- Provides a comfortable and secure rearing environment that supports natural behaviors
- Minimizes stress and effectively reduces the incidence of vent pecking and cannibalism
- Promotes robust bird health and contributes to consistently low mortality rates
- Offers optimal, scientifically calculated floor space per bird to ensure adequate activity and comfort
- Streamlines farm operations and significantly improves overall management efficiency
- Ensures excellent flock uniformity, supporting good growth and development

## Support and Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. Our comprehensive technical support and services include:

- **Installation Guidance:** Ensuring smooth installation and proper functionality of the system
- **Regular Maintenance and Repair Services:** Keeping the system in optimal working condition
- **Technical Troubleshooting:** Quickly resolving any issues encountered during use
- **Training and Instruction:** Providing training on system usage and best practices in poultry management

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
