

## Comply With Ethical Farming Standards Globally Cage Free System Enhancing Bird Health

### Our Product Introduction

#### Basic Information

- Place of Origin: chengdu, china
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: Cage-free system
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: D/P,T/T
- Supply Ability: 50000 sets per month

#### Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Ventilation And Cooling System, Automatic Manure Removal System
- Trading Methods: FOB, CFR, CIF, EXW
- Highlight: **cage free system ethical farming,  
cage free bird health,  
global cage free standards**

## Product Description

# Comply With Ethical Farming Standards Globally Cage Free System Enhancing Bird Health

Farmrob is built on a deeply rooted "chicken-first" philosophy, guiding every stage of our design and manufacturing process. Our layer cages are precision-engineered from high-strength alloy, selected for exceptional sturdiness and long-term resilience under continuous, heavy-duty use. Built to withstand global weather conditions, the advanced corrosion-resistant coating ensures the cages will not rust, warp, or degrade over time, significantly reducing maintenance needs and extending operational lifespan.

For over three decades, Farmrob has been a trusted global partner, supplying state-of-the-art poultry equipment to farm owners across North America, Southeast Asia, the Middle East, and Africa. Our decades of international experience have given us deep insight into regional farming practices, climate challenges, and regulatory frameworks. Rather than a one-size-fits-all approach, our products are thoughtfully customized to accommodate local characteristics that align with local labor availability and management preferences.

Globally, the cage-free system is recognized as the gold standard in modern layer farming, reflecting a broader commitment to ethical food production and improved bird health. Farmrob fully embraces this movement with our advanced cage-free system, which provides hens with generous, unencumbered room for natural movement, all within a carefully managed environment prioritizing hygiene, feeding efficiency, and easy egg collection. By combining the proven benefits of cage-free living with Farmrob's hallmark durability and customization, we empower farmers to meet evolving consumer expectations, comply with tightening animal welfare regulations, and achieve optimal productivity without ever compromising on the quality of life for the birds.

## Features

### Durable Trough

Crafted from high-strength Al-Mg-Zn alloy, the trough delivers outstanding corrosion resistance and robust structural integrity, ensuring reliable performance even under continuous pecking and wear.

### Multi-Layer Design

The innovative multi-layer configuration is engineered to maximize spatial efficiency while prioritizing bird comfort. This design enables hens to move freely, effectively minimizing overcrowding and eliminating thermal hotspots that often compromise flock health in conventional systems. Air circulation is significantly enhanced, ensuring uniform temperature distribution and optimal air quality throughout every tier. Ample activity platforms are strategically positioned at each level, respecting the birds' natural instincts for exploration and perching while maintaining proper stocking density.

### Multiple Perches with Stairs

The system incorporates strategically placed perches and connecting stairways that fully accommodate chickens' roosting instincts. The improved rest quality translates into better overall health and physiological stability, contributing directly to more consistent and stable egg production cycles. The stair design ensures smooth and easy access between different levels, allowing hens of all sizes and ages to navigate the system comfortably without injury or excessive effort.

### Automatic Egg Collection

Eggs are gently and smoothly transported via a stable conveyor belt that minimizes vibration and jostling during transit. The eggs are then seamlessly gathered by an automatic egg lift, which conveys them to a centralized collection point with precision and care. This fully mechanized process significantly reduces manual handling, thereby lowering labor costs and minimizing human error while preventing cracks, fractures, and surface damage.

### Inclined Cushion

The nest box creates a comfortable environment for laying. Additionally, the nest position can be raised at night, effectively preventing hens from entering and settling in the nest during roosting hours. This nighttime elevation discourages unwanted incubation and broodiness, ensuring that hens remain focused on laying rather than sitting, thereby maintaining consistent egg production and reducing the likelihood of egg-soiling or damage.

## Why Choose Us?

Farmrob has more than 30 years of poultry farming experience and mature systems.

Customized construction and project design and engineering solutions

Reasonable and cost-effective quotation

Chicken-oriented and animal-friendly equipment

Advanced technical equipment with 25-year lifespan

Provide installation and technical guidance

Training for farmers on how to properly care for the birds and use and maintain the equipment  
Thoughtful service and perfect after-sales service system
