

High-quality Layer Chicken Cage System Offering End To End Control Over Manufacturing Process Delivering Consistent And Poultry Housing Equipment

Our Product Introduction

Basic Information

- Place of Origin: Chengdu, China
- Brand Name: Farmrob
- Certification: ISO9001, CE
- Model Number: H-type layer equipment
- Minimum Order Quantity: 200 sets
- Price: USD 65-200/set
- Packaging Details: Normal export packing 20ft / 40HQ container
- Delivery Time: 60 days
- Payment Terms: D/P,T/T
- Supply Ability: 50000 sets per month

Product Specification

- Features: Anti-corrosion, Durable, Easy To Install, Easy To Clean
- Characteristics: Automatic Drinking System, Automatic Feeding System, Automatic Egg Collection, Automatic Manure Removal System
- Service Life: Over 15 Years
- Trainings: Installation, Maintenance, Debugging
- Tier Height: 700 Mm
- Trading Method: EXW, CFR,CIF, FOB
- Highlight: **Layer Chicken Cage System,
Poultry Housing Equipment,
End To End Control**

Product Description

End-to-End Manufacturing Control

Farmrob operates six specialized workshops, each dedicated to a key stage of production: metalworking, mesh fabrication, machining, welding, assembly, and electrical controls. This comprehensive in-house setup allows us to manage every critical step of the manufacturing process under one roof.

By manufacturing our equipment's main structure in-house, we maintain end-to-end control over the entire production process — from raw material processing to final assembly and electrical integration. This vertical integration eliminates reliance on external suppliers and ensures that every component meets our strict standards before it reaches the assembly line.

As a result, we are able to guarantee precise dimensions and superior quality in every product we deliver. This level of control upholds our commitment to providing farm owners with the most suitable solutions as well as high-quality, durable products that perform reliably for years to come.

Key Features

Advanced Drinking Water System

Our newly developed UPVC water pipe features outstanding non-deformation performance, ensuring long-lasting durability and reliable operation. The system adopts a double water line design to provide a sufficient supply of drinking water. It is equipped with double needle clamp nipples featuring a patented structure that effectively prevents debris from clogging the drinkers. All components are made of no-aging stainless steel and high-quality plastic, guaranteeing both hygiene and longevity.

Each tier is fitted with a pressure regulator to ensure enough daily drinking water, while built-in filters help the chickens drink clean and healthy water. The system also comes with a special backflush water device, which can directly discharge dirty water from the flushing water line outside the house, making routine cleaning and maintenance simple and efficient.

Corrosion-Resistant Wire Mesh

The burr-free wire mesh is carefully manufactured from high-quality Q235 Al-Zn alloy, a material known for its outstanding corrosion resistance. This premium alloy combines the strength of steel with the protective properties of aluminum and zinc, ensuring that the wire mesh remains durable and reliable even when exposed to moisture, humidity, and other harsh environmental conditions.

In addition, the excellent corrosion resistance of the Q235 Al-Zn alloy significantly extends the service life of the wire mesh, reducing the need for frequent replacement and lowering long-term maintenance costs for poultry farmers. This makes it an ideal choice for modern poultry farming systems that demand high performance, safety, and durability.

Support & Services

The cage rearing system is a high-quality, durable solution designed to meet the needs of poultry farmers. Our technical support and services include:

Installation Guidance: Ensuring smooth installation and proper functionality of the system.

Regular Maintenance and Repair Services: Keeping the system in optimal working condition.

Technical Troubleshooting: Quickly resolving any issues encountered during use.

Training and Instruction: Providing training on system usage and best practices in poultry management.

We are committed to delivering exceptional customer service and support to help your poultry farming business thrive.
